

The Flu Vaccination

What is the Flu?

The Flu, or Influenza, is a highly contagious viral infection that can cause fever, headaches, extreme fatigue, general aches and pains and sometimes a cough. Often confused with the common cold it is much more severe and can lead to days, or even weeks, of time off work. In some groups of people such as the elderly, the young, or people with compromised immune systems it can even be life threatening.

Protect you and your family this year by receiving your annual Flu vaccination in the convenience of the Pharmacy. No script needed from your GP.

Why get a Flu Vaccination?

A Flu vaccination helps to prevent or limit the symptoms of the Flu each winter. There are many at risk people who benefit from building resistance to the Flu through a vaccination each year. The Flu strain changes each year so it is vital at risk people have a vaccination each year. At risk people can include:

- ✓ Anyone who cares for young children
- ✓ Anyone over the age of 65
- ✓ Anyone who can't afford time of work due to illness

NOTE: Even if you had a Flu vaccination last year you will need one this year because the strain is always changing.

How does a Flu vaccine program work?

Come in store you will receive:

- ✓ A consultation with one of our qualified health professionals – please bring your Medicare card
- ✓ Your Flu vaccine administered
- ✓ A place to rest for 10-15 minutes after the Flu vaccine where our professional staff are on hand to monitor you in case of any unlikely side effects

Our Flu vaccination service is quick and convenient, taking only 5 minutes with parking at the front door.
